Aspiring Front End Web developer who is very detail oriented and has a life-long dedication to learning, in my current job I created a new website for the showroom and also brought in using an AutoCAD system for more detailed kitchen designs which led to increased sales. In my current position as a kitchen designer I oversee and arrange kitchen fits which involves a lot of problem-solving and being extremely methodical which I excel at. Known among staff for learning quickly and thriving while doing challenging tasks. I am currently enrolled on a Front End Web developer bootcamp with previous self learning experience.
